PROFESSIONAL SUMMARY

Computer Science graduate with a strong foundation in backend development, system design, and data-driven problem-solving. Experienced in building structured digital solutions, conducting usability evaluations, and coordinating testing initiatives. Passionate about developing scalable systems and leveraging technology to solve real-world problems.

EDUCATION

B.Sc. Computer Science & Informatics – Federal University Otuoke, Nigeria (First-Class Honors, 2025)

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Artificial Intelligence, Statistics, Project Management

WORK EXPERIENCE

Design Instructor – Skysenx-Hub (Apr 2024 – Sep 2024)

- Delivered hands-on training in 3D design using TinkerCAD, guiding students through practical modeling projects.
- Introduced students to 3D printing workflows, from model preparation to final output.
- Mentored students to build strong foundational skills in 3D modeling and design thinking.

PROJECT EXPERIENCE

Virtual Campus Tour Web Application (Final Year Project)

- Designed and developed a web-based virtual tour to improve campus accessibility and navigation.
- Conducted usability testing sessions and gathered structured user feedback.
- Analyzed feedback to improve system performance and user experience.
- Presented project at a technology event and achieved 3rd place.

Backend API Development Projects (FastAPI)

- Developed RESTful APIs for structured data handling and integration.
- Implemented authentication and validation logic for secure systems.

- Designed scalable and maintainable backend architectures.

Software Testing Coordination Initiative

- Created and managed a departmental usability testing group.
- Coordinated feedback collection and issue reporting.
- Improved product quality through structured testing processes.

CORE SKILLS

Backend Development & Programming: Python, JavaScript

Database & Data Handling: SQL, PostgreSQL

Web Technologies: HTML, CSS

Tools & Workflow: Git, VS Code, Draw.io

Data & Analysis: Basic statistical analysis, data interpretation

SOFT SKILLS

Analytical thinking, structured problem-solving, communication, teamwork, adaptability

INTERESTS

Artificial Intelligence, Data-Driven Systems, Public Sector Innovation, Technology for Development
